Where the Volcano meets the Ocean

Welcome to Camiguin Volcan Beach Eco Retreat & Dive Resort on the beautiful Island of Camiguin!

In the next pages we would like to introduce our resort and some activities to make your stay unforgettable.

Camiguin

The “Island born of Fire” is located in the Bohol Sea off the northern coast of Mindanao.

Its seven volcanoes rise majestically up into the sky.

Deep ocean blue surrounds the emerald green valleys and lush rainforest dominating the landscape.

The islanders are still unspoiled and very hospitable.

The fertile lava soil of Camiguin grants prosperity to all.

It cultivates the best fruits, especially the juicy and sugar sweet Lanzones fruit.

The offer of natural beauty on Camiguin Island is inexhaustible.

Whether you seek fantastic white sand or black volcanic beaches, hot or cold springs, breathtaking waterfalls or treks through practically untouched nature or even an amazing underwater world, Camiguin Island leaves almost nothing to be desired.

WHY ECO?

“Because we love life and nature, but without intact nature, there is no life worth living. Therefore, we never forget to respect nature in all we do.”

Since the very beginning when Camiguin Volcan Beach was just a vision, ECO was the priority. That’s why we have held tightly to our principles throughout all, from the original planning and construction to the way we run our tours and the experiences we offer to our guests today.

We believe, our resort should have the least impact on nature as possible and the local community should benefit from it.

The buildings are integrated in the landscape without changing the terrain or cutting away any trees.

To treat the bamboo against bugs, it was saturated with sea water instead of using chemicals.

To avoid pollution by toilet paper, we installed bidet nozzles and gave each building its own 3 chamber septic tank.

The “Hotel Smart Card System” helps us to conserve energy when rooms are not in use.

To better protect our wonderful house reef, we applied for the “Fore-Shore lease” for an area of about 2000 m². We plan to use this area to start a “Coral Conservation Program” for breeding corals. The project has become very popular and is even supported by the local government.

All of our craftsmen come from the surrounding villages. They organized all the construction with materials found right here on the island. Most of our resort staff come from Camiguin as well.

OUR ECO-RESTAURANT

ECO is all over our food. You will see that we love nature and we enjoy tasting it.

Our own herb garden provides us with all the spices and aromas we need.

Fresh fruits, meat, eggs and vegetables come either from our own farm or from organic farmers of Camiguin.

Fishermen bring their daily catch directly to us from the sea and shore; we can gather Sapay (sea ears), Toyum and Suwaki (sea urchins) to delight all gourmets.

The “House Special” is rabbit. They are bred ECO-friendly on our farm, but that’s not all, we also breed our own chickens and goats!

Homemade bread is freshly baked every morning along with our delicious desserts and pastries.

In addition to our standard menu, we offer daily specials, all of which are made with the freshest ingredients and seasonal produce brought straight from the local market. Saturday evening is BBQ time!

Beef, chicken, tuna, shrimp, lobster or, of course, our famous rabbit are prepared to your taste.

Another of our unforgettable homemade products is our creamy yogurt. Try it with some of the local fruits of Camiguin, which grow rich from the nutrients found in our volcanic soil.

Sunburned? ... Ask for our helpful Aloe Vera, and we can fetch you some from the herbal garden.
